

## Planisware Version Upgrade Testing

### Ensure a smooth Planisware version upgradation

#### <Explore our services>

Keeping your Planisware platform up to date is essential for maximizing its potential and ensuring your organization stays at the forefront of project management excellence. i2e's expertise as a certified Planisware partner uniquely positions us to guide you through the intricate process of version upgrades, with a focus on comprehensive testing that guarantees a seamless transition.

#### Why should you opt for version upgrade testing?

- **Minimized disruptions:** Rigorous testing ensures that the upgrade process is smooth and minimizes disruptions to your ongoing projects. This translates into uninterrupted workflows and sustained productivity.
- **Overhead reduction:** We meticulously plan the detailed testing process considering various scenarios. This will reduce the overhead cost and fill any skill set gap.
- **Reduction in timelines:** Our experts can plan the testing process in parallel to the upgradation process, this can significantly reduce the upgradation timelines. It also minimizes the impact on critical processes.
- **Zero failure upgradation:** Upgrade testing helps in identifying any disruptions early on and fixing them before the actual upgrade. This results in a 100% success rate.
- **Informed decision-making:** Testing helps you identify potential impacts of the upgrade on critical processes with data-backed evidence. This empowers you to take accurate decisions and manage the process strategically.

#### Our Approach

We employ a systematic approach to Planisware version upgrade testing, our process is agile and can be tailored to your organization's specific needs:

1. **Requirement analysis:** We start by understanding your business objectives, current system configurations, and desired outcomes from the version upgrade.
2. **Test planning:** Our experienced team develops a comprehensive test plan, outlining the testing scope, methodologies, and success criteria for the version upgrade.
3. **Test case design:** i2e designs detailed test cases, covering various aspects such as functionality, performance, and compatibility with existing integrations.
4. **Execution and validation:** Our team executes the test cases, meticulously validating each component of the upgraded system to identify and address any issues promptly.
5. **Regression testing:** We conduct regression testing to ensure that existing functionalities remain intact and unaffected by the version upgrade.

6. **Documentation and reporting:** Comprehensive documentation and detailed reports are provided, outlining the testing process, identified issues, and recommendations for resolution.

#### **Why choose i2e Consulting?**

- **End-to-end testing services:** From requirement analysis to documentation, i2e Consulting offers end-to-end version upgrade testing services, providing a comprehensive solution for your Planisware platform.
- **Certified Planisware partner:** i2e Consulting is a certified Planisware partner, ensuring that our team possesses the expertise and knowledge required for seamless version upgrade testing.
- **Customized solutions:** We understand that each organization has unique requirements. Our approach is tailored to your specific business needs, ensuring that the version upgrade testing aligns with your objectives.
